PIGS	PERINATAL PERIOD		

### DIGESTIVE DISORDERS

**PectoPro**  
Anti-diarrheal preparation for calves  

- inhibits diarrhea and digestive disorders
- stabilizes the microflora of the gastrointestinal tract
- supports the regeneration of the body, regulates water and electrolyte balance

**DiarrSpeed Vet**  
Preparation against acute diarrheas  

- stops diarrheas very fast
- source of electrolytes
- prevents acidosis

**Bovi Drench Vet**  
Drenching preparation  

- stimulates the digestive function due to magnesium content
- stimulates the production of gastric juices
- perfect solution in case of impaction and indigestion

**Farma forte**  
Preparation normalizing the functioning of the gastrointestinal tract  

- reduces the risk of digestive disorders in the period of increased risk
- has constrictive effect on mucous membranes of the gastrointestinal tract
- stabilizes the microflora of intestines

**Toxisorb plus**  
Preparation absorbing mycotoxins and endotoxins  

- binds toxins contained in poor quality fodder
- works in the gastrointestinal tract, reducing the risk of digestive disorders
- has antiseptic effect

**Rumen vet**  
Preparation increasing rumen motility  

- strengthens the secretion of gastric juice and bile
- stimulates appetite and has anti-inflammatory effect
- addition of wormwood strengthens the action of salivary glands

**Tympanic vet**  
Preparation eliminating bloating and colic  

- inhibits the fermentation process
- facilitates the removal of accumulated gas bubbles
- has a positive effect on the rumen microflora

**HydroGel Vet**  
Regenerating preparation preventing dehydration  

- regulates digestion during digestive tract disorders
- seals the intestinal mucosa thanks to a specially selected herbal composition
- glutamine in the product promotes regeneration of intestinal villi

**DiarrGel Vet**  
Preparation preventing diarrhea for calves and cows  

- stabilizes digestive functions
- has constrictive properties on intestinal mucosa
- due to yeasts content it complements gastrointestinal microflora

**CarboGel Vet**  
Preparation helping against diarrheas  

- binds bacterial toxins
- stimulates peristalsis of the gastrointestinal tract
- has protective functions due to the content of black cumin
- stabilizes the microflora of gastrointestinal tract

**RumenGel Vet**  
Gel stimulating digestion  

- discourages the aggressive piglets from digestive disorders
- supports the production of gastric juices
- stabilizes the microflora of gastrointestinal tract

### METABOLIC DISORDERS

**StopGel Vet**  
Preparation inhibiting diarrheas in cows  

- reduces the penetration of water into the intestinal lumen
- has constrictive properties on intestinal mucosa
- yeast content stabilizes intestinal microflora

**Glikol Vet**  
Preparation limiting the cases of ketosis  

- contains easily absorbable glucogenic ingredients
- stimulates carbohydrate metabolism due to the content of group- B vitamins
- addition of sodium propionate reduces energy deficiency

**Hepa Protect**  
Preparation supporting liver function  

- supports fat metabolism
- supports liver regeneration after antibiotics and diseases
- addition of sodium propionate reduces energy deficits

**Energia Bovi Pover Vet**  
Preparation for prophylaxis and treatment of ketosis  

- quickly replenishes the electrolyte deficiency
- supports regeneration of the body after disease, diarrhea or transport

**Energia Vet**  
Energetic preparation with selenium, niacin and betaine  

- reduces the effects of negative energy balance
- unique consistency facilitates the feeding
- supports liver regeneration

**Energia Hepamin**  
Energetic preparation improving liver functions  

- provides easily digestible energy sources
- eliminates the effects of a negative energy balance
- unique consistency facilitates feeding on the energy table
- protected methionine works hepatoprotective

**ProRumen SC**  
Preparation reducing the risk of acidosis  

- buffers the content of the rumen
- stabilizes the gastrointestinal microflora
- to be used prophylactically in high-yielding cows

**ProBuffer**  
Preparation against acidosis  

- recommended in the treatment of acute acidosis
- fast action
- easy to use product

**Kanibal Off Green**  
The preparation limiting cannibalism in pigs  

- discourages the aggressive piglets from digestive disorders
- supports the production of gastric juices
- stabilizes the microflora of gastrointestinal tract

**CTX 20 Plus**  
Herbal product limiting the occurrence of digestive disorders  

- discourages the aggressive piglets from cannibalism
- regulates digestion and has constrictive effect on mucous membranes
- facilitates the identification of aggressive individuals and their elimination from the herd

### CARE

**MastiVet**  
Warming ointment with camphor  

- warms up the udder
- stimulates blood circulation
- soothes the skin

**MintVet**  
Cooling gel with menthol  

- eliminates postpartum and post-traumatic edema
- promotes the absorption of exudate
- soothes the skin

**CalenVet**  
Care ointment with marigold  

- moistures and nourishes udder skin
- soothes irritations and microcracks
- intended for daily care

**Placen tabs**  
Bolus for heifers and cows facilitating the expulsion of the placenta  

- improves the resistance of udder tissues
- limits the development of microorganisms
- supports the process of cleansing the uterus after delivery
- improves cow resistance after calving

**Soma tabs**  
Bolus helping to reduce the number of somatic cells in milk  

- strengthens the hoof and regenerates the tissue
- helps against most common hoof diseases
- supports the process of keratin synthesis

**Pedes tabs**  
Bolus improving the health condition of hooves  

- strengthens the hoof and regenerates the tissue
- helps against most common hoof diseases
- supports the process of keratin synthesis

**Lavenderm**  
Herbal ointment strengthening the udder  

- inhibits the growth of viruses
- promotes the absorption of exudate
- soothes irritation and minor injuries
- regenerates and nourishes skin

**Uter tabs**  
Bolus for heifers and dried cows reducing the risk of difficult calving  

- has antiseptic and antifungal properties
- activates sex hormones production
- complements mineral and vitamin deficiencies in dry period
- supports the calving process

**Turbo tabs**  
Bolus facilitating the process of cleaning the uterus after delivery  

- thins residual lung excretion and facilitates expectoration
- facilitates the cleaning of uterus after calving
- regulates the symptoms of first estrus after the calving

**Bronchimax (liquid) / Bronchimax pulvis (powder)**  
Preparation supporting respiratory tract diseases  

- thins residual lung excretion and facilitates expectoration
- relieves irritation of the upper respiratory tract
- has antiseptic effect, increasing immunity of the organism

**IMMUNO Pover Milk**  
Strengthening milk replacer for calves  

- rich source of immunoglobulins, vitamins and minerals
- stimulates the development of the rumen
- designed for weakened calves, or fed with low quality colostrum

### HENS

**Ovulik**  
Tablets improving the fertility of sows and boars  

- increases the index of farrowing of sows and boars
- regulates digestion and has constrictive effect on mucous membranes
- eliminates toxins from feed
- recommended during weaning, feed change and transportation

**Ran-stick**  
Wound healing aid  

- protects the wound from infections
- regenerates bitten skin
- supports the reconstruction of damaged tissues

**O-vet gel**  
Slip gel for rectal treatments  

- creates a slip layer to protect tissues from damage
- useful in rectal examination and gynecological procedures
- facilitates the calving

**Over Reds**  
Formulation limiting the occurrence of red mites  

- after administration the formulation is released in the feces and uropygial gland
- produces specific compounds affecting the environment
- nymphs die, what facilitates their removal

**CalciGel Vet**  
Preparation for milk fever prevention  

- provides two sources of easily absorbable calcium
- supports calcium metabolism in the postpartum period
- supplements calcium and other mineral deficiencies

**VIPover drink**  
Postnatal energizing drink  

- compensates energy losses
- reduces the risk of abomasum displacement
- supports immune system

### PERINATAL PERIOD

**Lacto stop**  
Preparation supporting drying off process  

- supports cow's drying process
- regenerates the mammary gland epithelium
- supports immune system

### IMMUNITY DISORDERS

**ImmunoGel Vet**  
Immunostimulating gel for calves and cows  

- activates cells of the immune system
- increases the concentration of immunoglobulins in the blood
- supplements immunoglobulins, vitamins, minerals
- delivers immunostimulating substances

**IMMUNO Pover Milk**  
Strengthening milk replacer for calves  

- rich source of immunoglobulins, vitamins and minerals
- stimulates the development of the rumen
- designed for weakened calves, or fed with low quality colostrum
